

# Development Team

OTB Spatial are looking for people who enjoy a challenge, who are passionate finding solutions to problems and developing products with customer focus and user experience as the highest goals.

To be successful in this role you will be:

- Able to multi task
- A good listener
- A problem solver
- Able to follow instruction

These are technology focussed positions, requiring the successful applicants to be familiar with and experienced in one or more of the below development environments/languages:

- iOS Development
- Android Development
- JavaScript (preferably with experience with the ArcGIS JavaScript API)
- PHP
- HTML5
- CSS
- Python (preferably with experience in arcpy)
- .Net

As well these development specific skill sets, we are looking for office/project managers to oversee specific projects and be responsible for the timely delivery of products and services.

These positions are open to anyone, anywhere as we are looking to set up a number of remote office locations for upcoming projects around the world.

We are looking to expand quickly so to apply or request more information, please contact
